

MAKE SAMPLING SIMPLER WITH

Simplify

SIELC introduces Simplify™ Probe — an electromechanical device capable of automatically collecting samples of reaction liquid from a closed or open vessel periodically with high accuracy and safety. After each sample, the probe clears the fluid path, preparing it for accurate, carryover-free next sampling cycle.

KEY FEATURES:

- **Connection:** requires Alltesta-Simplify autosampler
- **Small dimensions:**
11 x 1 inch, DIA ¼ inch. Immersion length up to 6 inch
- **Contact with liquid:**
Stainless Steel 316 (316L), PEEK & PTFE
- **Variable sample volume:** from 5 to 500 µL
- **Max. working pressure:** 120 psi (8 bar)
- **Max. working temperature:** 200 °C
